Fai Alharthi

Software Developer

faialialharthi@gmail.com | 0559446070 | LinkedIn: Fai Alharthi | GitHub: FaiAlharthi | Portfolio

SUMMARY

Software developer with hands-on experience building web and mobile applications, mainly with Java and Spring Boot, and also Python, React, Swift, and more. Experienced in turning ideas into AI-powered projects.

EDUCATION

King Saud University | *Bachelor of Computer Science* — Class of 2026

TRAINING

Web Development Bootcamp: Java & Spring Boot | *Tuwaiq Academy, Misk* — Aug – Oct 2026 · 300 hours

Software Development Bootcamp Using Python | *Saudi Digital Academy & WeCloudData* — May – Jun 2026

Cooperative Training | *KACST* — 300 hours

- Applied machine learning in Java and worked with semantic web tools to structure and query data.
- Built an Android app in Java and analyzed Arabic and English text for sentiment.

Apple Developer Academy | *Tuwaiq Academy & Apple* — Sep 2024 – Jun 2025 · 800 hours

- Built iOS apps with Swift and AI features, from design to App Store release.

PROJECTS *Selected highlights, more projects on GitHub*

Atahad: Group Challenge App — Oct 2026

- Built a platform where groups take on shared challenges and track each member's weekly progress and contribution.
- Automated the group rules, including removing members who repeatedly miss, so organizers don't have to follow up manually.
  Technologies: Java, Spring Boot, MySQL, Docker, n8n, Flutter

Tumooh: AI Job Application Tracker — Oct 2026

- Centralized applications, interviews, and reminders in one place, with a directory of 1,000+ Saudi companies.
- Automated status updates by reading job-related emails, with WhatsApp alerts when something changes.
- Added AI-generated next steps and draft replies to offers and rejections.
  Technologies: Java, Spring Boot, MySQL, Gemini API, Gmail, WhatsApp API

Masar: AI Guide for Business Licenses | *Kanz Hackathon, Gold Evaluation* — Jul 2026

- Designed a chat advisor that gives Saudi founders a clear step-by-step license plan, with costs and timelines.
- Grounded every answer in official government sources, so founders get reliable guidance instead of guesses.
  Technologies: Next.js, TypeScript, Tailwind CSS, Claude API

Procify: AI Procurement Platform — May – Jun 2026

- Built one platform for the full procurement cycle: writing requests for proposals, inviting vendors, and collecting their offers.
- Added AI to score each offer against the request and suggest suitable vendors, helping teams compare faster.
  Technologies: React, FastAPI, Python, SQLAlchemy, Ollama, Gemini API

Credit Card Fraud Detection Using Generative AI | *Graduation Project* — Dec 2025 – Jan 2026

- Applied generative AI to create realistic fraud examples, helping detection models learn from rare cases.
- Validated the generated data and tested its effect on several classification models.
  Technologies: Python, Generative AI, GANs, LLMs, Machine Learning

SKILLS

Languages: Java, Python, JavaScript, Swift, SQL, HTML, CSS
Backend: Spring Boot, FastAPI, REST APIs
Frontend & Mobile: React, Next.js, SwiftUI
Databases: MySQL, SQLite
AI & ML: Generative AI, LLMs, RAG, Machine Learning, Sentiment Analysis
Tools: Git, GitHub, Docker, Postman, Figma, n8n
Soft Skills: Problem Solving, Critical Thinking, Teamwork, Communication

CERTIFICATES

iOS Development Course | *Tuwaiq Academy, MCIT* — May – Jun 2022 · 80 hours

Apple Foundation Program | *Tuwaiq Academy & Apple* — Jul – Aug 2023 · 1 month
